

WinPass - Quick Start Tutorial

Installation and Start Up

- Download WinPass from the Internet and install it on your PC.
- At the end of the installation WinPass will display a Welcome Dialog.
- Click the  button.
- WinPass will display a Password dialog and prompt you to enter your **Master Password** twice.
- Enter the Password and click **OK**.

WinPass is now installed and ready to serve you.

Learning a new Entry (sample)

- Open your browser and navigate to the login page of your favorite webmail service (Gmail, Yahoo, HotMail, etc...).
- On WinPass click the  button.
- The "Learn New Entry" dialog will open.
- In the browser enter the Username and Password - (You must enter both even if the browser already remember some information).
- Click **Submit** or **Login** on the browser.
- WinPass will popup a confirmation message box.
- Click **Yes**.
- The "Learn New Entry" dialog will close and the name of the service will appear on the WinPass list.

Repeat this procedure to add more entries.

Using WinPass to login to a website

- Double Click the name of the service on the WinPass list (or click the  icon).
- Wait for the browser to open and display the login form.
- With the left mouse button **Double Click** the Username input box.

WinPass will perform automatically the login procedure by filling the Username & Password fields and clicking the **Submit** button.
